

SPIKE DISPLAY

DISPLAY CONTROL TERMINAL

The SPIKE DISPLAY is a monitor specifically designed for Spike series products. It is available in an 8-inch version that supports both PAL and SDI video formats, as well as 10-inch and 12-inch versions that support SDI only. It has the functions of taking photos and recording videos and also supports the input and simultaneous display of two channels of video signals. With its functionality and reliability, the SPIKE DiSPLAY has become an excellent accessory for Spike series products.
