

40mm rocket launcher low light scope

1. PURPOSE

The 40mm rocket launcher with a low-light scope is equipped on the Type 6940mm rocket launcher. It is a multi-use optical scope for aiming and shooting at night.

2. Technical parameters

The observation distance of people is 300 meters and that of vehicles is 600 meters under starlight or weak moonlight.			
Magnification	4 ×	Field of view	10°
Parallax	≤2'	Moderate adjustment range	(-5~+2) diopter
Focusing range	20m~∞	The tilt of the partition board is less than	≤60'
Zero position accuracy	<0.7mil	Zero adjustment range high and low direction	高低方位 ± 12mil
Continuous working time	>30h	Working temperature	-40℃~+50℃
Weight	<2kg
